## EXPERIENCE

### Postman — Senior Product Designer, 2021-25

Led the design of high-impact features like request auto complete, which drove 800% growth in paid team usage and contributed to a 15% increase in requests sent by paid users. Led the planning and design for a new global search UX, and initiatives for a responsive Postman, keyboard-first design, and standardizing AI abstractions. Designed and maintained global areas of app used by over 40 million users, contributed to theming, and was a core maintainer of the design system and application UX design libraries.

### upGrad — Design Manager, 2020-21

Led design teams across recorded and live learning, career outcomes, and core pods, guiding the revamp of learning experience, defining the vision and framework for core platforms, and the development of design system. I also led the design for the career center and initiated efforts to build a product-driven culture.

### Relay — Design Lead, 2019-20

I focused on defining the mission and vision, roadmap, MVP planning and strategy, product design foundations, frontend packages, and brand direction.

### LimeRoad — Lead Product Designer, 2018-18

My key areas of ownership, from shaping to shipping, included the LimeRoad CTP experience, which increased signups by 6x, and the LimeRoad Gold experience, leading to a 25% increase in returning users.

### Kayako — Product Designer, 2014-18

I helped take a new product from zero to \$2 ARR, introduced the Kayako messenger home screen concept to the world. Overall NPS up by 62%.

### Digitech — Interaction Designer, 2012-14

At Digitech, I designed and maintained the frontend for various B2B and B2C products and marketing sites.

## OPEN SOURCE WORKS

A collection of open source ideas I've built over the years.

New UI Framework	<a href="#">/NewDesignFile</a>
Sargam Icons	<a href="#">sargam-icons</a>
Accessibility Compliance API	<a href="#">api.birdie.page</a>
New CLI	<a href="#">npx create-new-ui</a>
Rhythm Versioning	<a href="#">rhyver.com</a>
Figma MCP Server	<a href="#">/figma-mcp-server</a>
Figma Plugin React	<a href="#">/figma-plugin-react</a>
Noun Project Icons	<a href="#">/planetabhi</a>
Dimer (Co-creator)	<a href="#">/dimerapp</a>

## TOOLING & AUTOMATIONS

Below are a few key automations, plugins, and widgets I've built to help design teams ship fast and responsibly.

MCPS	AI to review design for applicable WCAG criteria
MCPS	A simple MCP server for Figma
PLUG	Get raw design node data for AI models
PLUG	Note-taking app for Figma
PLUG	Auto accessibility compliance for components
PLUG	CLI to control Figma using commands
PLUG	Generate a typography scale and CSS variables
T00L	Hand-off of icons from Figma to production
T00L	Auto post file version history to Slack daily
T00L	Ask, capture and collate feedback in Figma

## WRITINGS

2025	Enabling the Focused, Deep Work
2025	Structuring Figma Variables
2024	Versioning to Align Software With Business Cycles
2023	The Missing Joy In AI-Generated Art
2022	Enabling a Keyboard-First Design
2021	Design Methodology Based on the Aesthetics of Indian Classical Music

## WORKS & EXPERIMENTS
